With Copper PTC

Why PTC Heating Is a Better Choice

'Positive Temperature Coefficient' (PTC) is a new heating technology that uses alternatives to traditional coil, electric heaters. Utilizing copper, an efficient and long lasting component, these heaters are superior to traditional coil electric heaters in all ways. They also have a built-in 'self-limiting' feature which prevents the heater from exceeding a certain temperature and therefore, requires no overheating protection. The Comfort Deluxe Heater is an affordable, safe and extremely efficient heater for anywhere in your home.

Copper PTC Advantages:

- **More Copper:** Over 4.5 sq. ft. of copper provides concentrated heat that permeates throughout the room
- **Increased Comfort:** Heater operations will not reduce humidity or oxygen levels, in your home
- **Enhanced Effectiveness:** Copper PTC heating elements are more efficient and retain heat far longer than aluminum
- **Increased Durability:** Extra long-life heating element that's built to last
- **Added Safety:** Copper has naturally-occurring antimicrobial properties

Comfort Deluxe Heater

Ideal for Any Room In Your Home - Small or Large

AirNmore is proud to bring you the new Comfort Deluxe Heater, designed to set a new standard in the portable heater industry.

Constructed using copper wiring throughout, together with a heavy duty, 14-gauge, grounded power cord, the new Comfort Deluxe Heater is the most efficient room heater in its class.

Designed with user safety in mind, the Comfort Deluxe Heater has industry leading, dual heat sensors that limit high temperatures. And for home environments with pets and small children, safety sensors provide advanced tip-over protection

Conveniently, in the event of a power outage, the 'Memory Mode' feature remembers all your settings when power is restored.

Enhanced Features

-  Copper PTC heating is safe, reliable, naturally antimicrobial and conducts heat 40% more efficiently than aluminum
-  Upgraded internal wiring and connectors ensure added durability and sustained, reliable performance
-  Cool to the touch and safe around children and pets
-  High quality casters make for easy relocation

Old Fashioned Customer Service

AirNmore has been a family-owned and operated business for 15 years.

Our owner, Paul Piasio, has over 20 years' experience working with electrical and electronic equipment and a further 10 years of direct expertise working with heaters and other consumer, household products.

At AirNmore we believe in old fashioned, personable customer service. It's what keeps our customers coming back year after year.
